DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The addition to claim 7 appears to be new matter. Where in the specification is that particular trimethyl silyl group mentioned?

The traverse is unpersuasive. This particular protecting group is nowhere mentioned.

Applicants point to specification, page 9, line 12, which has "silyl group", and original claim 1, which had "a silyl group". But that does not describe this particular one. Silyl is SiH_3 , the group formed by the removal of a H from Silane, SiH_4 and is a term analogous to methyl, CH_3 . If the term is understood to be any substituted silyl group, then there is no particular reason to select this one. There are many substituted silyl groups which are used as protecting groups for carboxyl. Just as an example, USP 5523400 lists trimethylsilyl,

Art Unit: 1624

triethylsilyl, t-butyldimethylsilyl, i-propyl-dimethylsilyl, and phenyldimethylsilyl, as examples of such protecting groups, and there are others as well. The fact that this trimethyl silyl group falls within the broad ambit of "silyl" is not sufficient. Applicants must show that they possessed that particular choice. See *In re Rushig*, 154 USPQ 118; *Fields v. Connover*, 170 USPQ 276, 280; *Watson v. Bersworth*, 116 USPQ 445; *Flynn v. Eardley*, 178 USPQ 288; *Ex parte Westfall*, 223 USPQ 631; *In re Prutton*, 96 USPQ 151; *In re Honn*, 150 USPQ 652; *In re Fried*, 136 USPQ 429. The fact that the choice falls within the broader genus is not enough.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
